

Global and regional COVID-19 epidemic models situation report No 28 – 2022-02-04

Farshad Pourmalek MD PhD

Former lecturer, University of British Columbia, Vancouver | UBC SPPH | ORCID | PubMed
pourmalek_farshad@yahoo.com

Combine and visualize international periodically updated estimates of
COVID-19 pandemic
at the **global** level and for **six WHO regions**

Based on uptake 20220204 in <https://github.com/pourmalek/CovidVisualizedGlobal>
JOHN only in uptake 20220204. IHME and IMPE models have not been updated since the
previous uptake of CovidVisualizedGlobal, and the SRIV model updated estimates are highly
implausible.

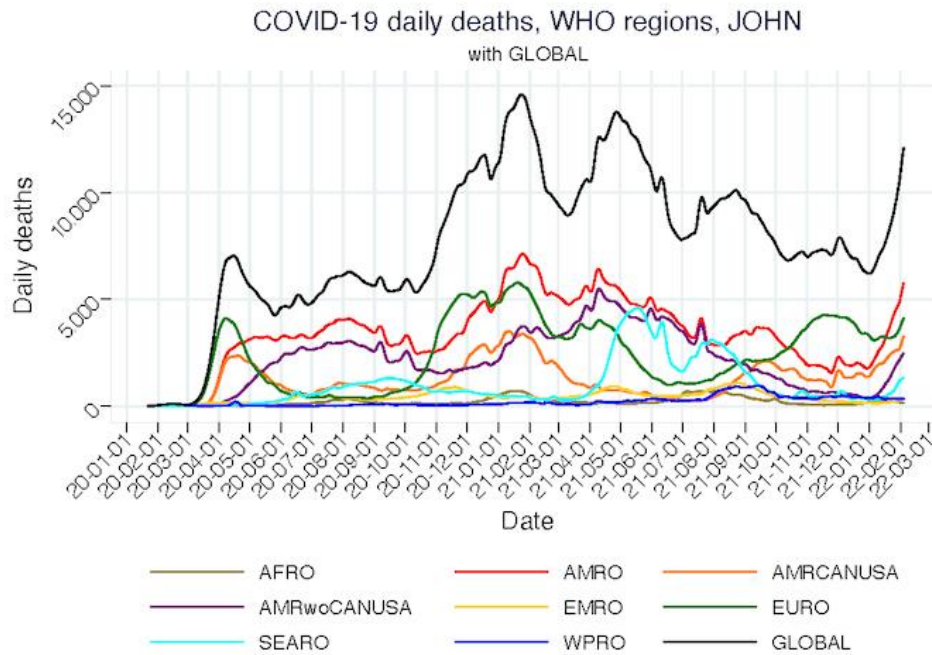

Summary

Daily reported deaths are on the rise at the Global level and in WHO region, except in EMRO (*slightly increasing*), WPRO (*stagnating*), and AFRO (*decreasing*).

Daily reported cases show a small upward nudge after their most recent peaks at the Global level and in WHO region, except AFRO (*decreasing*). Daily cases have *not peaked* in EURO and EMRO yet.

Selected graphs

(0a) Regions together [Daily deaths, with GLOBAL, all time, JOHN](#)

(0b) Regions together [Daily deaths, without GLOBAL, all time, JOHN](#)

(0c) Regions together [Daily deaths, without GLOBAL, 2022, JOHN](#)

(00a) Regions together [Daily cases, with GLOBAL, all time, JOHN](#)

(00b) Regions together [Daily cases, without GLOBAL, 2021 on, JOHN](#)

(00c) Regions together [Daily cases, without GLOBAL, recent, JOHN](#)
