Honourable distinguished scientists,

Updated Global COVID-19 epidemic models situation reports are available at (https://github.com/pourmalek/CovidVisualizedGlobal) every Monday morning.

Thank you,

Farshad Pourmalek

October 4, 2021

Honourable distinguished scientists,

I am a physician and epidemiologist who has worked at the University of British Columbia, University of Washington, WHO, UNDP, and UNICEF.

Please see the attached the "Global COVID-19 epidemic models situation report No 09 - 2021-10-01.pdf"

International and periodically updated models included are DELPHI (Cambridge), IHME (Seattle), Imperial College (London), Los Alamos (Los Alamos), and Srivastava (USC, Los Angeles).

All the material for the global level is available at a GitHub repository I created here

https://github.com/pourmalek/CovidVisualizedGlobal, including the scientific journal articles on this work. I have shared similar Situation Reports from the GitHub repositories for Canada (https://github.com/pourmalek/CovidVisualizedCountry) and Iran (https://github.com/pourmalek/covir2).

The objective is to facilitate the review of the predictions of the COVID-19 epidemic models for the technical advisors to the decision-makers.

Thank you,

Farshad Pourmalek

Reply-To: Farid Najafi < farid_n32@yahoo.com>

Dear Dr. Pourmalak

Thank you for sending regular reports on the covid-19 situation report in Iran. I forwarded this email to Dr. Younesian who is not in charge of the National Epidemiology Committee. I believe that such reports are very helpful and informative and hope to present the latest update next week in National Scientific Comittee.

Regards

Farid Najafi MD PhD

Epidemiologist

Deputy Minister of Research and Technology

The Honourable Deputy Prime Minister,

The Honourable Ministers of Health,

Chief Public Health Officer of Canada,

Chief Provincial Medical and Public Health Officers,

I am a physician and epidemiologist who has worked at the University of British Columbia, University of Washington, WHO, UNDP, and UNICEF.

Please see the attached 11th situation report of **predictions of the COVID-19 epidemic trajectory in Canada at the national and province levels** in the next three months.

I have created and shared these summary situation reports for Canada and provinces using the results of five international and periodically updated COVID-19 epidemic studies since July 2021, with recent addition of the PHAC-McMaster model since September 2021.

The objective is to *facilitate* the review of the predictions of the COVID-19 epidemic models for the technical advisors to the decision-makers.

All the material is available at https://github.com/pourmalek/CovidVisualizedCountry.

Thank you,

Farshad Pourmalek
